

TECHNICAL SERVICE BULLETIN

SUBJECT: AC range of retarders end of life announcement

Products Affected: Axial Product Line

Effective Date: 17-May-2024

Telma is committed to a philosophy of continuous improvement as a way of enhancing the end-user's experience with our product.

The AC range of retarders, designed and developed in the early 1980s, has now reached the end of its life cycle. For over 10 years, the AC model range has been replaced with the new AD and AF generation series of retarders. With optimized efficiency, these modern retarders offer multiple improvements in mass, size, and power consumption.

Complete retarders and stator assemblies for the AC series are no longer available. Replacement parts such as hubs, rotors, coils, and flanges will be available until the existing supply has been exhausted.

We would like to thank you for your continued use of Telma retarders.

Please see a complete list of affected models and part numbers on the following page.

For more information, please contact your Telma dealer for replacement parts.
